Add whole blood, serum or plasma to circular well

Step 2

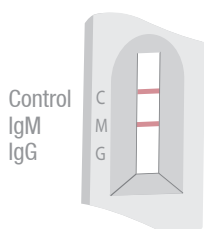

Add 2 drops of buffer to square well

Step 3

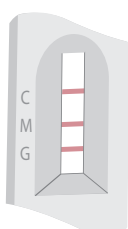

Read result in 15 minutes

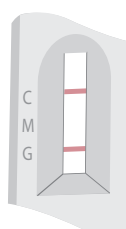

Interpretation

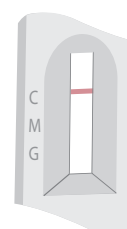

IgM positive
Primary dengue

IgM and IgG positive
Secondary dengue

IgG positive
Secondary dengue

Negative

“The risk for the development of DHF rises substantially with second or subsequent infections by different serotypes.”
McBride, 1999.²

Panbio: excellent customer service

Technical support

- Staffed by scientists
- All requests replied to within 24 hours

Sales representative support

- In-service support
- Troubleshooting guides
- Scientific studies

Panbio website

- All e-mail queries and requests responded to within 48 hours
- Technical data, links to publications

Additional information

- Detailed performance data available

Ordering information

Catalogue number	Description	No. of tests
R-DEN03D	Dengue Duo Cassette	25

Full range of dengue ELISAs also available

Catalogue number	Description	No. of tests
E-DEN01G	Dengue IgG Indirect ELISA (For detecting past/active dengue infection)	96
E-DEN01M	Dengue IgM Capture ELISA (For diagnosis of active dengue infection)	96
E-DEN02G	Dengue IgG Capture ELISA (For diagnosis of secondary dengue infection)	96
E-DEN01D	Dengue Duo IgM & IgG Capture ELISA (For differentiation between primary & secondary dengue infection)	192
